What have you found after one minute? Score one point for each object in a circle, and score five points for an object in the overlapping part of the Venn diagram.

Try this, too!

Use loops of string to make two overlapping circles on a table. Write some adjectives on pieces of paper and put them in a container. Mix them up, then draw two of them. Now race to find some suitable objects!

Here are some more ideas:
Circle A = likes broccoli
Circle B = likes tomatoes
Circle A = likes camping
Circle B = likes basketball
Circle A = has brown hair
Circle B = has glasses
