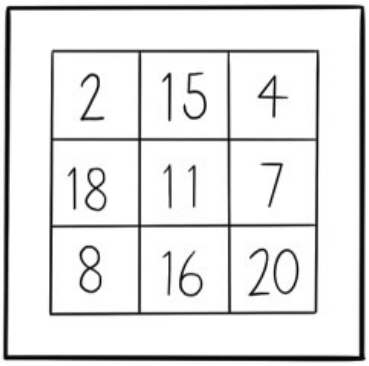
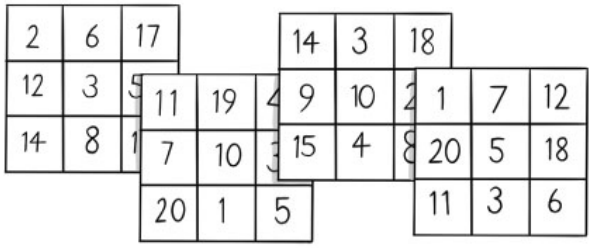
2	15	4
18	11	7
8	16	20

5 Copy them onto one of the cards like this:



6 Keep doing the same thing to make all the cards—but for each new card, check to make sure that you haven’t picked the exact same numbers that another card has. All the cards should have a different mix of numbers on them.



7 Next, write the numbers 1–20 in a list. Next to each number, write a mathematics problem that equals that number—like this:
