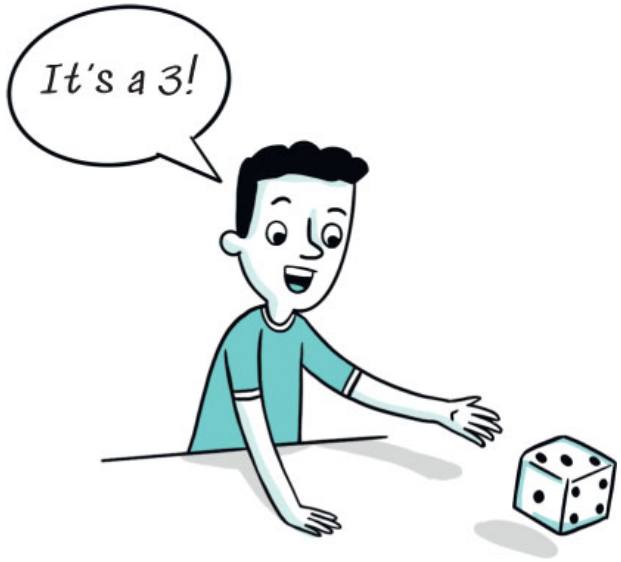
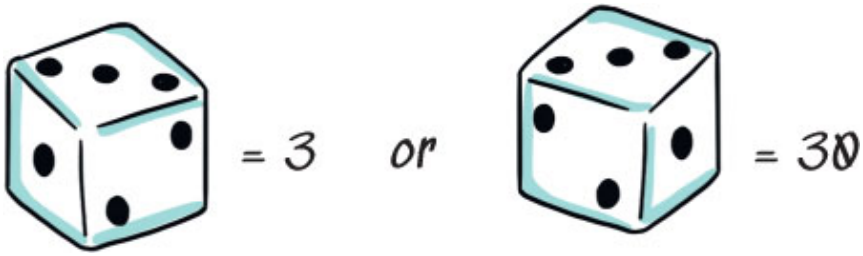
1 Each team picks a scorekeeper, who keeps the score on paper.

2 The teams take turns playing. On each turn, they choose one person to roll the dice and shout out the number they've rolled.



3 Each time the dice is rolled, the team can choose whether to use that number or to multiply it by 10. So, for example, if you roll a 3, you can count it as a 3 or as a 30.



4 The aim is to add up all the numbers your team scores and try and get to 101—but no higher.
