GLOSSARY

Average The middle or typical value of a group of numbers, found by adding the numbers together, then dividing by the number of numbers in the group.

Base ten A number system that uses ten digits, from 0 to 9.

Base two A number system that only uses two symbols—0 and 1.

Binary A counting system based on 2, instead of the usual base 10 (or decimal) system.

Circumference The distance around the edge of a circle.

Decimal number A number between two whole numbers, with part of the number written after a decimal point, such as 1.6 or 3.75.

Diameter The distance across the middle of a circle.

Digit A single whole number symbol. The digits we normally use in mathematics are 1, 2, 3, 4, 5, 6, 7, 8, 9, and 0. Digits are combined to make other, larger numbers.

Encryption The process of converting a message or other information into code.
