

2 Each player decides how they will decorate their pebbles. In the example, one player is green and the other silver.

3 When it’s your turn, you can fill in one, two, or three pebbles. It’s up to you! The aim is to end up with an odd number of pebbles—NOT an even number.

4 When all the pebbles are done, count up how many each person has. If you have an odd number, you’re the winner!
