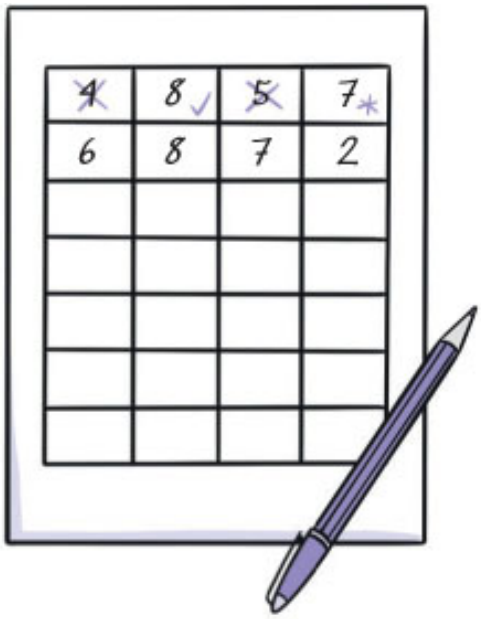
A STAR *

… means the right number in the WRONG place.

And a CROSS through the number X

… means the number is completely wrong.

5 Armed with this knowledge, player two can now take another guess.



They’ll keep the 8, since that’s right.

They’ll keep the 7 but try putting it somewhere else.

They’ll drop the 4 and 5, since they’re wrong, and try other numbers.

They’re getting closer! 6 is wrong, but 8 and 7 are now both in the right place, and there is a 2, though it’s not in the right place.
