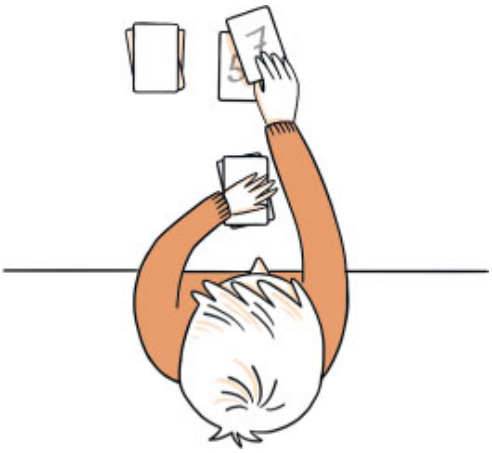
3 Deal the cards into two piles, face down. The players take one pile each, then take turns turning over a card and putting it in the middle.



4 The game ends when one person runs out of cards—the other is the winner!

5 When it’s a prime number, the first to yell “PRIME!” gets to take the middle pile.

Game science

Prime numbers are a BIG puzzle for mathematicians. They seem to go on forever, and no one has found a pattern to them. Can you see any patterns in the prime grid on the opposite page?
