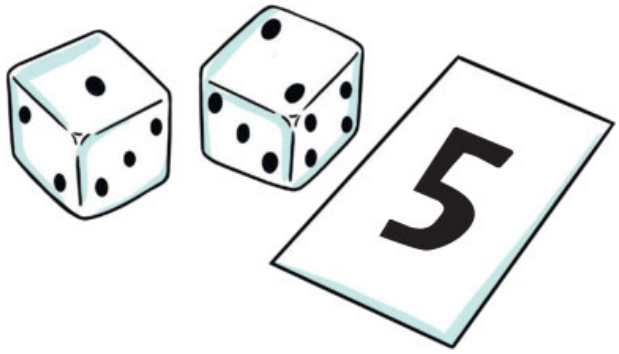
6 If the other player gets theirs in first, you have to take your card back and keep it.

7 But if a player tries to put the wrong card in, they have to take the card back, too. So if you use your seven, but they use their six, you win the point and get to put your card in, even if you were slower.


8 Keep playing the same way until one person has no cards left. They’re the winner!
