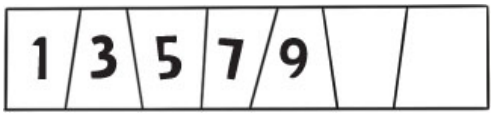
This is a number sequence—a set of numbers in order. In this case, it’s the basic whole number sequence, which we use for everyday things like house numbers. We all know it because we start learning it as babies. But there are other number sequences, too …

How to play

1 Try solving these sequence puzzles. They start off quite easy, then get harder! For each one, you have to figure out how the sequence works, then fill in the missing numbers.

Here’s an example:



Did you spot it? You just add two each time. So the next numbers are 11 and 13.

Here’s another:

In this sequence, you add three each time. The answers are 23 and 26.

A LITTLE BIT HARDER …
