Checking your temperature when you feel sick

… all kinds of things!

A world of numbers

Mathematics is a key part of science and technology. We need it to make things work—from making airplanes and rockets fly, to creating weather forecasts, to building skyscrapers and bridges that won't fall down, to making sure people take exactly the right amount of medicine.

If we didn't do the mathematics to get all these things right, it would be a disaster!

Have fun!

Mathematics isn't just important—it can also be fun. And you can make it extra fun by playing number, shape, and calculation games, like the ones in this book.

We've got …
