Now you’re on your own! (But you can check the answers at the end of the book.)

***It’s mathemagical!***

## Create your own!

Now that you know how it works, you can think up your own sneaky number sequences for someone else to crack. Here are a few ideas …

- ***A number sequence that gets lower instead of higher***
- ***A sequence that uses multiplying instead of adding***
- ***A sequence that uses fractions or decimal numbers***
