11	
10's	1's
••••• •••••	•
One 10	One 1
1	1

In base 10, each column is 10 times bigger than the next column.

1,000's	100's	10's	1's

But binary has just two symbols:

0	1

Base 2

In binary, you use just 0 and 1, and then start again, using two columns to show the number 2.
