1 For each player, cut five rectangles from a piece of cardboard (or cardboard box).

2 Now draw dots on the cards, like this.

3 In this game, you flip a five-digit binary number into base 10 as fast as possible.

4 To do it, put your cards in front of you in order, all facing up.

5 Match the 0s and 1s in the binary number to the five cards. Flip over all the cards that match with a 0.

For example, for 10101, you would flip these two cards:

6 Now add up the dots to give you the answer in base 10.
