V: 01010110

W: 01010111

X: 01011000

Y: 01011001

Z: 01011010

2 To write a coded message, write down the binary code for each letter.

3 Write them all down in a long string with no gaps.

4 To decode the message, your friend separates the numbers into blocks of eight ...

... then finds the right alphabet letters from the list!
