Mathematicians also show pi using this symbol:

π

1 Your challenge is to memorize as many digits of pi as possible by creating your own sentence. Each word in your sentence should have the same number of letters in it as the number you want to remember.

2 Here are the first 10 digits—could you make them into a sentence?

3.141592653

The weirder the sentence, the easier it will be to remember. Here's one!

Dad,	I	drew	a	green	chameleon	on	Mabel's	magic	hat!
3.	1	4	1	5	9	2	6	5	3

3 Can you do a better one, or a longer one?
