three.js (https://github.com/mrdoob/three.js)	WebGL API, DOM API	Renders 3D graphics and animations for immersive web experiences.

Table A.3 showcases React libraries that similarly leverage HTML APIs for enhanced functionality.

Table A.3 Popular React libraries leveraging HTML APIs

Library	HTML APIs leveraged	Use case
Ant Design (https://github.com/ant-design/ant-design)	Canvas API, SVG API, DOM API	Provides customizable UI components.
React DnD (https://github.com/react-dnd/react-dnd)	Drag and Drop API	Simplifies the implementation of drag-and-drop functionality in React apps.
React Flow (https://github.com/xyflow/xyflow)	Canvas API	Creates interactive node-based graphs and diagrams.
React Markdown (https://github.com/remarkjs/react-markdown)	DOM API	Renders Markdown as HTML elements.
React PDF (https://github.com/wojtekmaj/react-pdf)	Canvas API, Blob API, FileSaver API, DOM API	Generates PDFs on the client side.
