It is highly recommended for developers to stay informed about and actively use the latest JavaScript features, including upcoming TC39 Stage 4 proposals, which represent finalized additions to the ECMAScript standard. These features, as shown in figure A.2 and listed in the TC39 Finished Proposals (https://github.com/tc39/proposals/blob/main/finished-proposals.md), are carefully designed to improve developer productivity, enhance code readability, and address common programming challenges.
