```
              </details>
            )}
          </div>
        )
      );
    }
    return this.props.children; #D
  }
}
```

This example is located in `components/error-boundary/ErrorBoundary.tsx`. To see the fallback UI in action (figure A.5), execute the command: `VITE_NAME=ErrorBoundaryExample npm run dev`.

Figure A.5 Fallback UI displayed by Error Boundary after catching an uncaught error

The console also displays the standard error message, shown in listing A.6.

Listing A.6 Console log output from the Error Boundary component

```
Error: This is a test error!
    at BuggyComponent (ErrorBoundaryExample.tsx:4:9)
The above error occurred in the <BuggyComponent> component.
React will try to recreate this component tree from scratch using
