```
    </div>
  );
};
```

This example, defined in `components/drag-and-drop/DragAndDrop.tsx`, demonstrates the implementation of the Drag and Drop API, providing an interactive user experience. The code creates a user interface, as shown in figure 2.8, featuring a draggable `<div>` element with the text "I am draggable" and a drop zone `<div>` element with a border, labeled "Drop Zone".

Figure 2.8 Initial UI before dragging the text "I am draggable."
