```
  );
}
```

Listing 2.10 provides essential CSS styling to enhance the form's visual appeal and user experience. The styling is defined in `components/form/index.css`:

- Adding vertical spacing below labels and inputs for better readability.
- Adding horizontal spacing on both sides of input fields for a cleaner layout.
- Displaying error messages in red for easy noticeability.
- Displaying success messages in green to provide clear positive feedback.

Listing 2.10 CSS styling for the form component

```
label, input {
  margin-bottom: 0.5em;
}
input {
  margin-left: 0.5em;
  margin-right: 0.5em;
}
.error {
  color: red;
}
.success {
  color: green;
}
```

These styling enhancements improve the overall user experience, making the form more readable, usable, and visually appealing.
