

The Pulse tab is pretty cool, but just like checking your own pulse, it only tells you if the project you're looking at is alive or not. In the context of GitHub, where open source projects tend to live, it's important to know if a project is alive or dead so potential consumers can decide if they want to use it. To get data that's more relevant for your purposes, check out the Graphs section. It has the typical breakdowns of CLOC and LOC that you'd expect to see from your source control project. Let's start with contribution over time, shown in figure 4.11.

Figure 4.11. The graph of contributors over time. From GoCD (github.com/gocd/gocd/graphs/contributors).
