

In figure 5.8 you can see some failed builds; that's okay, especially on complex projects. You can start getting worried when your failed builds start to become a high percentage of your total builds, as shown in figure 5.9; that's usually a signal that something is pretty wrong and you need to dig in.

Figure 5.9. A worrisome trend: lots of bad builds

If figure 5.9 is bad, then you might think something like figure 5.10 is good.
