- Error rates
- Response times

The first important bit of data you can learn from New Relic dashboards is shown in figure 6.8, which shows how long web responses take and where the response time is spent.

Figure 6.8. New Relic dashboard overview showing the performance of the different layers of a web application

Because New Relic is looking at how much time consumers are spending on your site, it can also tell you what the most popular pages are, as shown in figure 6.9.
