bottom shows that SCM activity over time is healthy.

Figure 9.18. The dashboard for the development team working on the data processing

Figure 9.19. The dashboard used by the program and project management team

Figure 9.20. The dashboard used by the leadership team to show the success of the initiative and the overall health of the contributing projects. Leadership is always paying attention to the consumer voice through their Twitter hashtags and the total revenue. They've added the average items per order to track the success of the latest development initiative and show overall ratings for each development team on the project.
