List of Listings

Chapter 3. Trends and data from project-tracking systems

- Listing 3.1. Excerpts from the raw data in a typical API response
- Listing 3.2. Example labels JSON block in a JIRA API response
- Listing 3.3. Example comments JSON block from an API call with hashtags in the text

Chapter 4. Trends and data from source control

- Listing 4.1. Abridged example response from the GitHub API
- Listing 4.2. Two identical conditional statements

Chapter 5. Trends and data from CI and deployment servers

- Listing 5.1. Partial response from the Jenkins dashboard for Apache's build server
- Listing 5.2. Jenkins response from a specific build

Chapter 6. Data from your production systems

- Listing 6.1. Using StatsD

Chapter 7. Working with the data you're collecting: the sum of the parts

- Listing 7.1. Algorithm for checking estimate health
- Listing 7.2. The algorithm as Groovy code

Chapter 9. Publishing metrics

- Listing 9.1. Using StatsD to add business-specific metrics to the code

Appendix A. DIY analytics using ELK
