3.1.2. Velocity

3.1.3. Cumulative flow

3.1.4. Lead time

3.1.5. Bug counts

3.2. Prepare for analysis; generate the richest set of data you can

3.2.1. Tip 1: Make sure everyone uses your PTS

3.2.2. Tip 2: Tag tasks with as much data as possible

3.2.3. Tip 3: Estimate how long you think your tasks will take

3.2.4. Tip 4: Clearly define when tasks are done

3.2.5. Tip 5: Clearly define when tasks are completed in a good way

3.3. Key project management metrics; spotting trends in data

3.3.1. Task volume

3.3.2. Bugs

3.3.3. Measuring task movement; recidivism and workflow

3.3.4. Sorting with tags and labels

3.4. Case study: identifying tech debt trending with project tracking data

3.5. Summary

Chapter 4. Trends and data from source control

4.1. What is source control management?

4.2. Preparing for analysis: generate the richest set of data you can
