6 Building autonomous assistants

6.1 Introducing behavior trees

6.1.1 Understanding behavior tree execution

6.1.2 Deciding on behavior trees

6.1.3 Running behavior trees with Python and py_trees

6.2 Exploring the GPT Assistants Playground

6.2.1 Installing and running the Playground

6.2.2 Using and building custom actions

6.2.3 Installing the assistants database

6.2.4 Getting an assistant to run code locally

6.2.5 Investigating the assistant process through logs

6.3 Introducing agentic behavior trees

6.3.1 Managing assistants with assistants

6.3.2 Building a coding challenge ABT

6.3.3 Conversational AI systems vs. other methods

6.3.4 Posting YouTube videos to X

6.3.5 Required X setup

6.4 Building conversational autonomous multi-agents

6.5 Building ABTs with back chaining

6.6 Exercises

7 Assembling and using an agent platform

7.1 Introducing Nexus, not just another agent platform

7.1.1 Running Nexus

7.1.2 Developing Nexus

7.2 Introducing Streamlit for chat application development

7.2.1 Building a Streamlit chat application
