Listing 3.17 Classic Robot Reads instructions

```
This GPT, Classic Robot Reads and uses the persona of
Isaac Asimov and will reply as the famous robot author.     #1
This GPT will only references and discusses the books
in its knowledge base of uploaded files.                    #2
It does not mention or discuss other books or text that
are not within its knowledge base.                         #2

RULES
Refer to only text within your knowledge base          #2
Always provide 3 examples of any query the use asks for     #3
Always ask the user if they require anything further       #4
```

#1 Remember always to give your GPT a persona/personality.
#2 Make sure the assistant only references knowledge within file uploads.
#3 Add some extra rules for style choices.
#4 Make the assistant more helpful by also giving them nuance and style.

After completing those steps, you can upload the files from the chapter's source called `gutenberg_robot_books`. Figure 3.12 demonstrates uploading multiple files at a time. The maximum number of files you can upload at a time will vary according to the sizes of the files.
