9.3.1 Getting started

9.3.2 Creating profiles with Jinja2 templates

9.3.3 Deploying a prompt flow API

9.4 Evaluating profiles: Rubrics and grounding

9.5 Understanding rubrics and grounding

9.6 Grounding evaluation with an LLM profile

9.7 Comparing profiles: Getting the perfect profile

9.7.1 Parsing the LLM evaluation output

9.7.2 Running batch processing in prompt flow

9.7.3 Creating an evaluation flow for grounding

9.7.4 Exercises

*10 Agent reasoning and evaluation*

10.1 Understanding direct solution prompting

10.1.1 Question-and-answer prompting

10.1.2 Implementing few-shot prompting

10.1.3 Extracting generalities with zero-shot prompting

10.2 Reasoning in prompt engineering

10.2.1 Chain of thought prompting

10.2.2 Zero-shot CoT prompting

10.2.3 Step by step with prompt chaining

10.3 Employing evaluation for consistent solutions

10.3.1 Evaluating self-consistency prompting

10.3.2 Evaluating tree of thought prompting

10.4 Exercises

*11 Agent planning and feedback*

11.1 Planning: The essential tool for all agents/assistants
