11.2 Understanding the sequential planning process

11.3 Building a sequential planner

11.4 Reviewing a stepwise planner: OpenAI Strawberry

11.5 Applying planning, reasoning, evaluation, and feedback to assistant and agentic systems

11.5.1 Application of assistant/agentic planning

11.5.2 Application of assistant/agentic reasoning

11.5.3 Application of evaluation to agentic systems

11.5.4 Application of feedback to agentic/assistant applications

11.6 Exercises

appendix A Accessing OpenAI large language models

A.1 Accessing OpenAI accounts and keys

A.2 Azure OpenAI Studio, keys, and deployments

appendix B Python development environment

B.1 Downloading the source code

B.2 Installing Python

B.3 Installing VS Code

B.4 Installing VS Code Python extensions

B.5 Creating a new Python environment with VS Code

B.6 Using VS Code Dev Containers (Docker)
