
GPT Nexus
Streamlit Interface
GPT Nexus -> Chat
New Chat
Recent chats
Chat: 2
The chat interface allows the user to select from various discovered agents, actions, and profiles, enabling the user to test different combinations.
Chat system
Nexus database
Agent Manager
Action Manager
Profile Manager
Agent classes exposed as plugins
Semantic and native functions exposed as actions
A YAML file that comprises the agent profile and persona
The database stores chat treads, user participants, and conversation history.
Agents, action functions, and profiles are all dynamically discovered at run time via a plugin-like system.
