Listing 8.9 Installing Nexus

```
# to install and run
pip install git+https://github.com/cxbxmxcx/Nexus.git

nexus run
# install in development mode
git clone https://github.com/cxbxmxcx/Nexus.git

# Install the cloned repository in editable mode
pip install -e Nexus
```

Regardless of which method you decide to run the app in after you log in, navigate to the Knowledge Store Manager page, as shown in figure 8.9. Create a new Knowledge Store, and then upload the `sample_documents/back_to_the_future.txt` movie script.
