

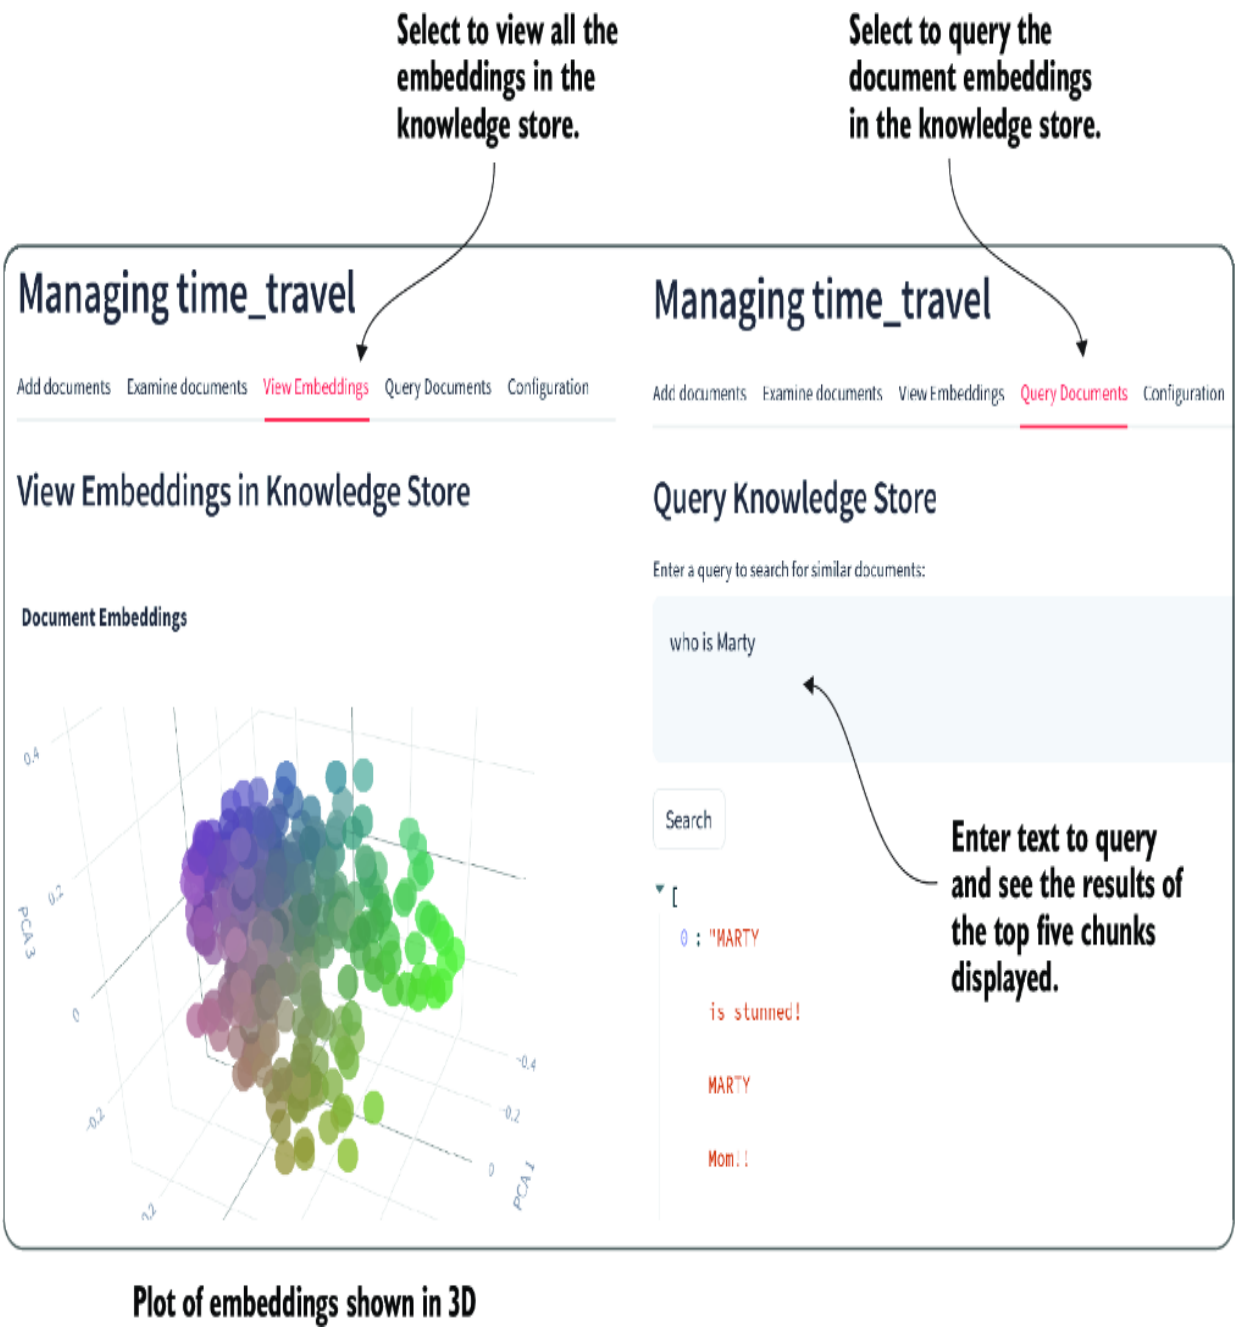

Figure 8.10 The embeddings and document query views

Now, we can connect the knowledge store to a supported agent and ask questions. Use the top-left selector to choose the chat page within the Nexus interface. Then, select an agent and the `time_travel` knowledge store, as shown in figure 8.11. You will also need to select an agent engine that supports knowledge. Each of the multiple agent engines requires the proper configuration to be accessible.
