The Agent Profile (prompts)

Persona
Represents the background and role of the agent, and is often introduced in the first system message.

Similar to prompt personas, the agent persona can give an agent specialized attributes, rules, and even personality.

Agent Tools
Set of tools an agent can use to help accomplish a task.

Actions and tools are added to the prompt under the covers.

Agent Memory and Knowledge
The backend store that helps the agent add context to a given task problem.

Knowledge and memory are prompts used to extract and identify memories.

Agent Evaluation and Reasoning
Describes how the agent can reason and evaluate a task or tasks.

Adding reasoning to prompts

Agent Planning and Feedback
Describes how the agent can break down a task into execution steps, and then execute and receive feedback.

Planning and feedback
