Download and Save
The summarized content from each Wikipedia page has been compiled. I will now save this information to a file named "Wikipedia_Calgary.txt".
The summarized content has been successfully saved to a file named Wikipedia_Calgary.txt. You can now access and review the detailed summaries of each Wikipedia page related to Calgary and its related topics.

Search Wikipedia for pages on Calgary and download each page, summarize it and save all the content to a file called Wikipedia_Calgary.txt
No instructions are needed, but be sure to select the actions: search_wikipedia, get_wikipedia_page, and save_file
Nexus and Playground have a feature that confirms the file indeed was saved.
In this example, the goal was extended to ask the assistant to summarize the content first before saving it to a file.
