

Figure B.1 Installing VS Code extensions

2. Install the following list of extensions:
   - Python, for environment and language support
   - Python Extension Pack, for covering other extensions
   - Python Environment Manager, for managing environments
   - Python Indent, for code formatting
   - Flake8, for code formatting/linting
   - Prompt Flow, for testing LLM prompts
   - Semantic Kernel Tools, for working with the Semantic Kernel framework
