2.3.3 Using delimiters

2.3.4 Specifying steps

2.3.5 Providing examples

2.3.6 Specifying output length

2.4 Choosing the optimal LLM for your specific needs

2.5 Exercises

3 Engaging GPT assistants

3.1 Exploring GPT assistants through ChatGPT

3.2 Building a GPT that can do data science

3.3 Customizing a GPT and adding custom actions

3.3.1 Creating an assistant to build an assistant

3.3.2 Connecting the custom action to an assistant

3.4 Extending an assistant's knowledge using file uploads

3.4.1 Building the Calculus Made Easy GPT

3.4.2 Knowledge search and more with file uploads

3.5 Publishing your GPT

3.5.1 Expensive GPT assistants

3.5.2 Understanding the economics of GPTs

3.5.3 Releasing the GPT

3.6 Exercises

4 Exploring multi-agent systems

4.1 Introducing multi-agent systems with AutoGen Studio

4.1.1 Installing and using AutoGen Studio

4.1.2 Adding skills in AutoGen Studio

4.2 Exploring AutoGen

4.2.1 Installing and consuming AutoGen
