Listing 3.3 Prompting for a data science assistant

```
FIRST PROMPT:
what is a good basic and interesting data science
experiment you can task someone with a single
csv file that contains interesting data?     #1
SECOND PROMPT:
okay, can you now write all those steps into instructions
to be used for a GPT Agent (LLM agent) to replicate all of
the above steps      #2

THIRD PROMPT:
What is a famous personality that can embody the agent
data scientist and be able to present data to users?      #3
```

#1 First, ask the LLM to set the foundation.
#2 Then, ask the LLM to convert the previous steps to a more formal process.
#3 Finally, ask the LLM to provide a personality that can represent the process.

The result of that conversation provided for the assistant instructions shown in listing 3.4. In this case, the assistant was named Data Scout, but feel free to name your assistant what appeals to you.
