

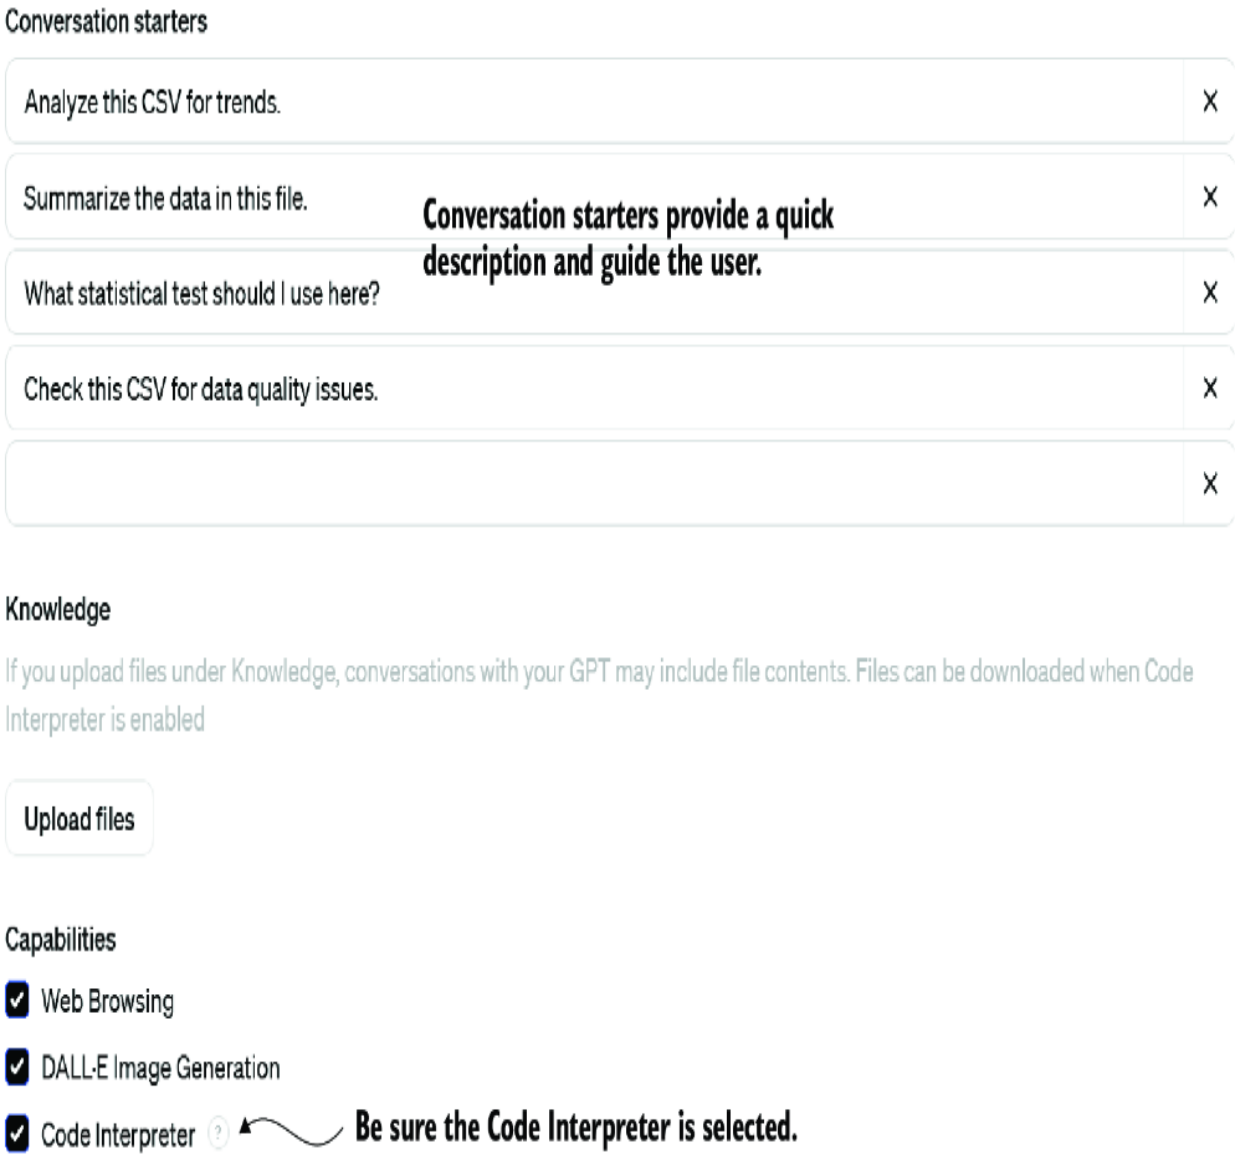

Figure 3.5 Turning on the Code Interpreter tool/skill

Now, we can test the assistant by uploading a CSV file and asking questions about it. The source code folder for this chapter contains a file called `netflix_titles.csv`; the top few rows are summarized in listing 3.5. Of course, you can use any CSV file you want, but this exercise will use the Netflix example. Note that this dataset was downloaded from Kaggle, but you can use any other CSV if you prefer.
