Using context

Ask signature

3.3 Ask with a payload

4 Akka test kit

4.1 Testing approaches

4.2 Sync testing

Effects

More than one actor

Testing the logs

4.3 Async testing

Using probes

Fishing for messages

Logging

Log capturing

5 Fault tolerance

5.1 What fault tolerance is (and what it isn’t)

Plain old objects and exceptions

Wrap it up and let it crash

5.2 Actor lifecycle events: Signals

5.3 Supervision strategies and signals

Uneventful resuming

Stopping and the PostStop signal

Restart and the PreRestart signal

Custom strategy

5.4 Watching signals from an actor

5.5 Back to the initial use case

Supervisor hierarchy initial design

Supervision hierarchy alternative design

6 Discovery and routing
