6.1 Discovery: The receptionist

6.2 The built-in integration router pattern

6.3 Balancing load using built-in routers

Akka pool router

Changing strategies

Akka group router

Consistent hashing strategy

6.4 Implementing the router pattern using actors

Content-based routing

State-based routing

7 Configuration

7.1 Trying out Akka configuration

Order

Subtrees

Substitutions

Using defaults

7.2 Akka configuration

7.3 Multiple systems

Lifting with Fallback

7.4 Configuration in tests

Lifting in tests

8 Clustering

8.1 On top of Akka Cluster

8.2 Why use clustering?

Cluster membership: Joining a cluster

Minimal cluster example

Starting the cluster

Leaving the cluster

Unreachable

Downing a reachable node
