8.3 Akka Management and the Cluster HTTP extension

Cluster subscriptions

8.4 Clustered job processing

In practice

The code

Work distribution in the master

Starting the cluster

8.5 Resilient job

Serialization

Testing is no different

9 Sharding and persistence

9.1 Akka sharding and stateful systems

The big picture

An example: A shipping container

The simplicity of the sharded entities

Rebalancing configuration

Passivation

Remembering entities

9.2 Persistence

The ingredients

Persistence combined with sharding: A persistent entity

Available effects

9.3 Customizing the persistent entity

Failure

Recovery

Snapshotting

Tagging

A peek at serialization and schema evolution

9.4 Running example

10 Streams, persistence queries, and projections
