

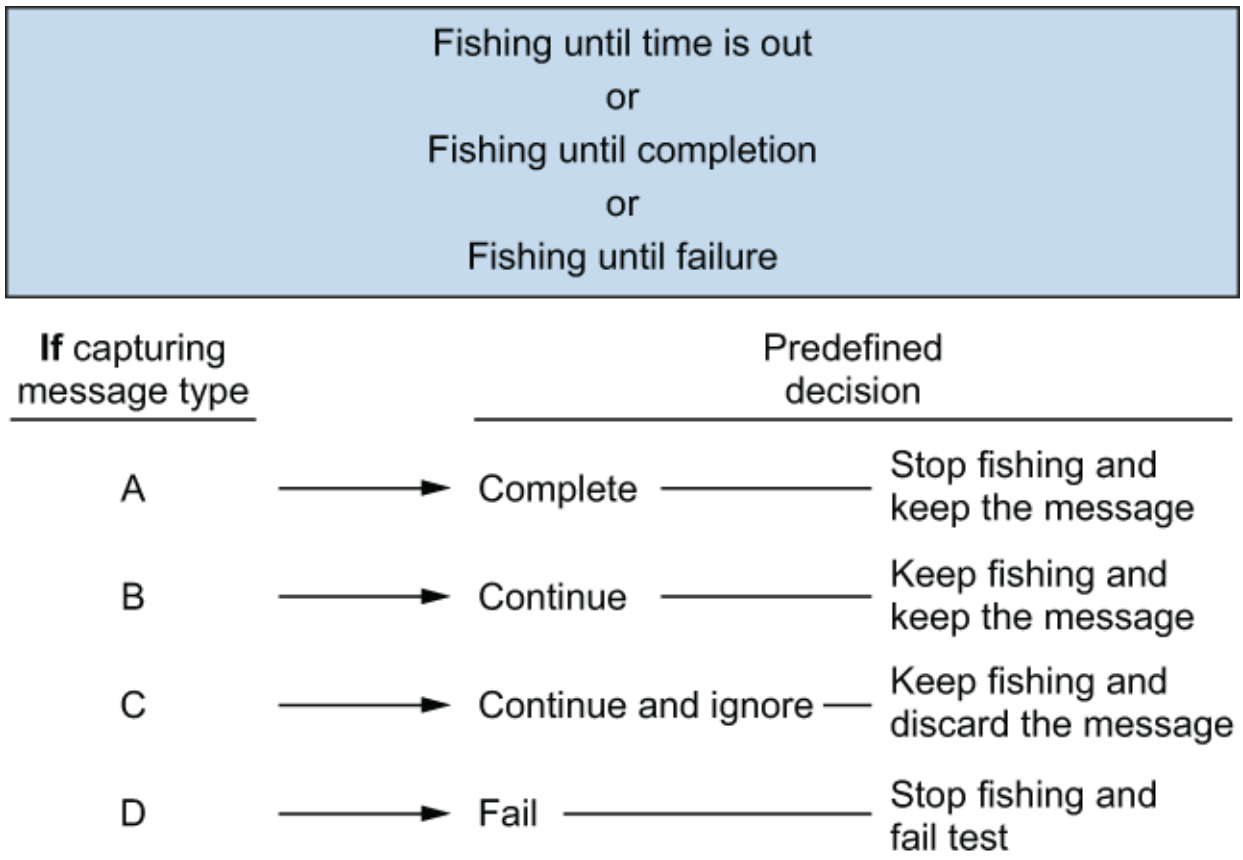

Figure 4.3 Possible fishing strategies

To prove that the counter resumes after a pause, you need to set the test to complete when the probe receives a `Resume` message. The wait time must be set greater than the seconds in `Pause(seconds: Int)`. Let's see this in action.

Listing 4.4 Fishing for the right message

```
class FishingSpec
    extends ScalaTestWithActorTestKit
    with AnyWordSpecLike
    with Matchers {

  "An automated resuming counter" must {

    "receive a resume after a pause" in {
      val probe = createTestProbe[CounterTimer.Command]()
      val counterMonitored =
```
