You can use kcat to interact with Kafka when dealing with Alpakka connectors or Akka projection. Go to https://github.com/edenhill/kcat#install, and follow the instructions.

A.7 Installing the AWS CLI

You can use the AWS command-line interface (CLI) to get credentials to upload files to Amazon when testing the Alpakka S3 connection. Go to https://docs.aws.amazon.com/cli/latest/userguide/getting-started-install.html and follow the instructions.

A.8 Installing Minikube

You can use Minikube to deploy an Akka cluster in a Kubernetes cluster. Go to https://k8s-docs.netlify.app/en/docs/tasks/tools/install-minikube and follow the instructions.
