shutting down nodes 151 – 153
Split Brain Resolver 277 – 281
starting clusters 145 – 148, 166
unreachable nodes 150 – 151
work distribution in master 162 – 166
configuration 126 – 137
configuration library 127 – 132
in tests 135 – 137
of multiple systems 133 – 135
overview of 132 – 133
connectors 284 – 305
Alpakka CSV 300 – 305
Alpakka Kafka 285 – 293
discovery and routing 108 – 125
balancing load using built-in routers 114 – 123
built-in integration router pattern 112 – 114
implementing router pattern using actors 123 – 125
receptionist 109 – 112
fault tolerance 82 – 107
overview of 83 – 91
signals 91 – 100
supervision hierarchy alternative design 101 – 106
supervisor hierarchy initial design 100 – 101
using actors 89 – 91
using plain old objects and exception handling 85 – 89
overview of 2 – 4
parser example
adapter 48 – 49
asking and expecting replies 52 – 63
coding 46 – 47
guardian, coding 47 – 48
overview of 45 – 52
workers 49 – 52
persistence 180 – 185
available effects 184 – 185
combined with sharding 184
customizing persistent entities 186 – 189
ingredients for 180 – 184
persistence queries 198 – 203
ports 217 – 237
Akka gRPC 228 – 236
