Alpakka Kafka 285 – 293
  auto-commit 290
  committable sources 290 – 293
  consuming from Kafka 287 – 288
  detecting consumer failures 290
  pushing to Kafka 293 – 298
   at-least-once delivery guarantee 295 – 298
   at-most-once delivery guarantee 293 – 295
   effectively-once delivery 298 – 300
apply function 60
apply method 60, 242, 245
architectural principles 361 – 364
  architectural patterns 362 – 363
  business abstractions 364
  event-driven systems 361 – 362
ask method 57, 60
ask signature 56, 59
asking 52 – 61
  coding manager 55
  coding worker 58 – 59
  overview of 56 – 58
  protocols 56
  signature 59 – 61
  simple question 53 – 55
  using context 59
  with payload 61 – 63
asynchronicity
  asynchronous decoupling 16
  asynchronous nature of actor programming model 18 – 19
  asynchronous unit testing 72 – 80
   fishing for messages 75 – 77
   log capturing 79 – 80
   log testing 77 – 79
   probes 72 – 74
asynchronous programming model 18
AsyncLogSpec test 79
at-least-once delivery guarantee 295 – 298
at-most-once delivery guarantee 293 – 295
atomicity, problem of 360
auto-down-unreachable-after setting 152
AWS CLI, installing 351
