B

BDD (Behavior Driven Development) 65
BeforeAndAfterAll trait 73
Behaviors factory 74
Behaviors functions 89
behaviors, keeping state with 37 – 40
Behaviors.stopped factory 78
bet actor 248, 258
BetProjection projection 315
BetRepository SELECT query 311
bets, in betting-house example application 248 – 258
  events and event handler 254 – 255
  initialization 251 – 252
  Open command 252 – 253
  private protocol 250
  public protocol 249 – 250
  Settle command 257 – 258
  states 250 – 251
  validating market and funds 255 – 257
betting-house example application 238 – 263, 306 – 324
  actors 239
   bets 248 – 258
   market 243 – 248
   wallet 239 – 243
  configuration 317 – 321
   Kubernetes clusters 319
   local clusters 319
   persistence 317 – 318
   services, sharding, and projections 320 – 321
  deployment 321 – 324
   running in Kubernetes 322 – 324
   running locally 321 – 322
  ports 259 – 263
  projections 307 – 317
   database projection 307 – 312
   entry point 316 – 317
   Kafka projection 312 – 316
blueprints
  function 194
  materialization of 196 – 197
  overview of 195 – 196
