remembering entities 179
shipping container application example 174 – 176
simplicity of sharded entities 176 – 178
state-based routing 123 – 125
stop method 69
store command 203
streams 193 – 198, 325 – 349
adding elements dynamically 346 – 348
blueprint 195 – 196
connecting to actors 334 – 336
exceptions 337 – 345
deciders 338 – 339
divertTo 340 – 341
modeling exceptions as data 339 – 340
restarting sources 341 – 345
finite streams 194
Flow 195
infinite streams 197 – 198
materialization 196 – 197
overview of 194
processing elements through services 326 – 334
CPU-bounded services 326 – 328
non-CPU bounded services 328 – 334
Sink 195
Source 194 – 195
String class 224
String parameter 224
String type 67, 121
Subscribe message 110
subscriptions 156 – 157
substitutions 129 – 130
subtrees 128 – 129
Success Future callback 301
Success option 52
supervise operations 21 – 22
supervision strategies 92 – 97
alternative design 101 – 106
custom strategy 97
initial design 100 – 101
restarting and PreRestart signal 95 – 97
stopping and PostStop signal 94 – 95
