```
                ';Secure;SameSite=strict';    #B
            window.location.replace('/natter.html');    #B
          });
        }
    })
    .catch(error => console.error('Error logging in: ',
error));    #C
}

window.addEventListener('load', function(e) {    #D
    document.getElementById('login')    #D
        .addEventListener('submit', processLoginSubmit);
#D
});    #D

function processLoginSubmit(e) {    #D
    e.preventDefault();    #D

    let username =
document.getElementById('username').value;    #D
    let password =
document.getElementById('password').value;    #D

    login(username, password);    #D
    return false;    #D
}
```

#A Encode the credentials for HTTP Basic authentication.
#B If successful then set the csrfToken cookie and redirect back to the Natter UI.
#C Otherwise, log the error to the console.
#D Set up an event listener to intercept form submit, just as you did for the Create Space UI.

Rebuild and restart the API using
