Listing 9.10 A simple message browser

```
<html>
<head>
<title>Capability Message Browser</title>
<meta http-equiv="Cache-Control" content="max-age=86400"/>
<script type="text/javascript" src="capability.js"></script>
#A
</head>
<body>
<h1>Natter</h1>
<a href="https://u9wu69dl5L8AT9FNe03TM- #B
[CA]s4H8M@localhost:4567/spaces/1/messages" #B
onclick="return loadMessages(this)"> #C
Load messages
</a>
<table id="messages"> #D
<tr><th>Author</th><th>Time</th><th>Message</th></tr> #D
</table> #D
</body>
</html>
```

#A Load the capability.js file.
#B Replace this with a read-only capability URI returned from a createSpace API call.
#C When the link is clicked it will call your JavaScript function.
#D A simple table to render message into.

To complete the simple browser, you need to implement the functions to load the messages. Listing 9.11 shows how to implement these functions. The functions use the `async` and `await` syntax of modern JavaScript to simplify the asynchronous loading of messages. (If you're not familiar
